

profi.com CostCenter

Accounting the QualityCenter usage of your customers

Audience:

- provider of the platforms
HP QualityCenter/HP ALM

Service:

- Basis of the billing
- Overview about activity and size of all projects
- Customer administration

applicable software:

- HP QualityCenter / HP ALM

Benefits:

- Payment according to amount of usage and resource consumption
- Comfortable web user interface
- Possibility to arrange or filter all data
- Dashboard for a general overview about the expenses of your projects
- Export the reports into different formats
- API for the integration into other applications

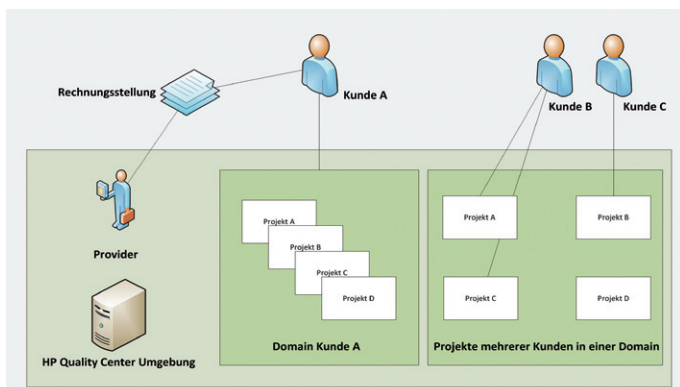

The solution: ... Keep track of your expenses with profi.com CostCenter!

Benefits for you as a provider:

- Support in the management of the platforms HP QualityCenter und HP ALM
- Administrating the customers/users of the provided environment
- Assignment of projects or entire domains to the customers
- Accounting the incurred expenses for each customer according to the projects assigned
- Costs can be based upon license usage, project dimension (determined by the sum of the repository and data size) and self-determined factor
- Expenses for the customer can be calculated for fixed periods of time
- Cost factors can be defined specifically for each customer
- Operating over a standardized and modern web user interface
- Comprehensive reporting
- API to transfer data to all programs
- Possibility to arrange or filter all visible data

Benefits for the customer:

- General survey about all incurred expenses:
 - In real time or
 - For defined accounting periods
- Breakdown of costs respective to the project
- The knowledge about the project-specific costs enables the customer to internally allocate expenses of the platform to single development projects

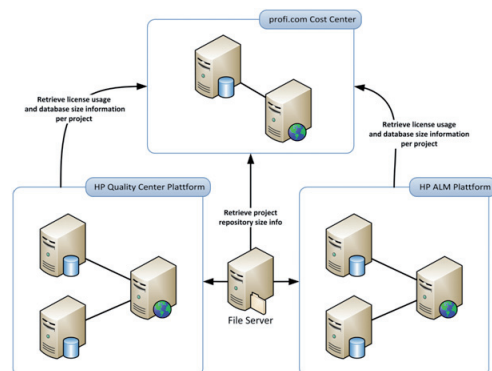

Further advantages:

- Time variance of all data
- Information about the license usage prior to a platform migration is still available and evaluable
- Evaluation of the extend of the project expansion on the basis of useful life and project dimension
- Accurate data helps supporting the budget planning of future projects

Technical construction:

- Periodic readout of all license information from the HP QualityCenter database and storage in the profi.com CostCenter database for the assignment to projects
- Services/agents supply information about the project dimension directly from the repository
- Storage within the profi.com CostCenter database to preserve all determined data
